The Caterpillar 3126 engine is a CAT engine that was used for light and medium duty uses. It was used in everything from boats, cranes, over the road trucks and ambulances to RVs and buses. It is based on an earlier design (3116), and when it was retired, the CAT C-7 was based on it and was it's replacement. I found a lot of diesel enthusiasts and truckers who really slammed the engine. Said ...

The CAT C7 shares many common configurations with the CAT 3126. The engine configuration was the same as the 3126 but the fuel system changed using a new engineered style known as the HEUI injector. The HEUI injector allows for multiple injections at different metered rates. Using a staged fuel distribution ratio helps improve engine combustion which ultimately reduces emissions ouput. The ...

They were rated up to 300hp. The dt466, which the 530 was based on, was a reliable engine. Not particularly powerful, but solid. Millions of school buses had them. They use high pressure oil to pressurize the fuel in the injectors. Since the oil has this dual purpose, it needs to be changed on time. The most common problems I've encountered is ...

The operator Equivalent Sound Pressure Level (Leq) is 81.5 dB(A) when ANSI/SAE J1166 FEB2008 is used to measure the value for an enclosed cab. The measurement was conducted at 100% of the maximum engine cooling fan speed. This is a work cycle sound exposure level. The cab was properly installed and maintained. The test was conducted with the cab doors and the cab windows closed.

It's no secret that the engine oil in the 7.3L Power Stroke gets worked hard. In addition to the 20-60 psi of oil pressure being used to lubricate the engine, the oil in the high-pressure circuit gets pressurized to more than 3,000 psi. This builds tremendous heat extremely fast. Luckily, the externally-located oil cooler on the 7.3L is up to the task. In addition to its location exposing it ...
