Some scanners can receive the HF (short wave) aircraft band in addition to the VHF and UHF aircraft bands. The HF band is not restricted to line-of-sight radio transmissions and can be used to monitor Shanwick and the trans-Atlantic routes etc. There are also multi-band scanners which cover much more than just the aircraft bands. Using a handheld scanner: A handheld scanner usually includes a ...

[Aircraft / Airplane Radio Receiver - Electronics DIY](#)

Airband or aircraft band is the name for a group of frequencies in the VHF radio spectrum allocated to radio communication in civil aviation, sometimes also referred to as VHF, or phonetically as "Victor". Different sections of the band are used for radionavigational aids and air traffic control.. In most countries a license to operate airband equipment is required and the operator is tested on ...

[Aviation/Airband Radio - Icom UK](#)

As this receiver is intended for airband, the bandwidth of the if-filter is given by the channel-spacing of 8.333 kHz, therefore a suitable filter-bandwidth would be approx. 6 - 8 kHz. As we wanted to realise this filter using crystals, a crystal in the range of 5 ... 20 MHz seemed appropriate. 36 MHz has been (finally) chosen because this frequency is widely available and such a high ...
