If the electricity interconnection between Denmark and Belgium becomes a reality, it will pass through the offshore waters of four different nations, and will probably be one of the world's longest DC high-voltage cables. Belgium needs considerable offshore wind power. Like many other European countries, Belgium is busy with the comprehensive green transition of its energy system. The ...

Turkey's Role in Global Energy Trade. Turkey has a high import dependency in energy. Therefore, Turkey aims to turn into a key energy trading center in its region by making use of its market size in energy and its geostrategic location. With this aim, Turkey has undertaken and carried out several important natural gas and oil pipeline projects in the region. In this scope, South Caucasus ...
